

ERRATUM

LoCasio III and Kudryashova 2013

Life: The Excitement of Biology 1(3):166-173

Recently, LoCasio III and Kudryashova wrote a paper entitled, “Preliminary survey of the butterflies and skippers (Insecta: Lepidoptera) in a wet subtropical sustainable forestry plot in Patillas, Puerto Rico” published in *Life: The Excitement of Biology* 1(3):166-173. The figure captions on page 171 have several mistakes, beginning on panel L. Currently, the legend reads, “l. and m. *Pseudosphinx tetrio* (Linnaeus, 1771), photo by Shawn Hanrahan, reproduced with permission; n. and o. *Agrius cingulata* (Fabricius, 1775 photo credit George LoCascio III (l to o, Sphingidae); p. *Diaphania hylinata* (Linnaeus, 1767) Crambidae, photo credit Tom Peterson, reproduced with permission.” Instead, that portion of the figure caption should read, L *Diaphania hylinata* (Linnaeus, 1767) Crambidae, photo credit Tom Peterson, reproduced with permission; M and N *Pseudosphinx tetrio* (Linnaeus, 1771) Sphingidae, N. photo by Shawn Hanrahan, reproduced with permission; O. and P. *Agrius cingulata* (Fabricius, 1775).
