

Do you know about ORCID?

Jorge A. Santiago-Blay¹

ORCID, an acronym for Open Researcher and Contributor ID, refers to a unique code that identifies individual authors that can be associated with their scholarly work. This could become particularly useful as our names may not be unique and/or may change through time and in the way they are rendered. For more information, please visit these links: <https://en.wikipedia.org/wiki/ORCID> , <http://support.orcid.org/knowledgebase/articles/171598-register-your-orcid-id> , and https://www.youtube.com/watch?v=a1Rijk_TMHA . To register, go here: <https://orcid.org/register> .

Errata

Jorge A. Santiago-Blay²

The email of Patrick Leeper, whose coauthored paper was published in *Life: The Excitement of Biology* 4(3):174, was inadvertently omitted. His email is pz15184@psu.edu .

The footnotes in Lambert et al. paper published in the printed version of *Life: The Excitement of Biology* 4(3):215 were out of register. The number 7 should have been a number 1; 8 a 2; 9 a 3; and 10 a 4. The electronic version of the issue benefited from the corrections. Also, Dr. Alberto Sidney Taylor Blake (Professor Emeritus for Research, Department of Botany, University of Panama, Panama City, Republic of Panama) is acknowledged for collecting the exudates from cycads in Panama.

The received and accepted dates were transposed in the article by Shen, *The Excitement of Biology* 4(3):237. The correct dates are, as follows: Received on October 16, 2016. Accepted on October 17, 2016.

I take responsibility for these oversights.
