

## Errata

### Two New Species of Cretaceous Scorpions from Burmese Amber (Arachnida: Scorpiones: Palaeoburmesebuthidae)<sup>1</sup>

Jorge A. Santiago-Blay<sup>2</sup>

In the previous issue of *Life: The Excitement of Biology*, Santiago-Blay et al. (2022), described two new species of fossil scorpions from the Cretaceous of Burma (Myanmar). Santiago-Blay, who also serves as Editor, made the following mistakes in Table 1. Herein, I correct those errors.

First, *Chaerilobuthus bautschi* is an incorrect combination; *Chaeriloscorpions bautschi* Lourenço in Lourenço and Velten, 2020 is the correct combination and validly described species.

Second, *Chaerilobuthus birmanicus* was named in Lourenço, 2015, not by Lourenço in Lourenço and Velten, 2020.

Third, *Chaerilobuthus knodeli* Lourenço, 2018 is an incorrect subsequent spelling of *Chaerilobuthus knodelorum*. *Chaerilobuthus knodelorum* was named by Lourenço, 2018, not Lourenço in Lourenço and Velten, 2015.

All species and authorships are correctly listed in the Literature Cited of Santiago-Blay et al. (2022) and in this paper.

#### Acknowledgments

Wholehearted thanks to Dr. Andrew J. Ross (Principal Curator of Palaeobiology, Department of Natural Sciences, National Museums Scotland, Edinburgh, Scotland, UK) who made me aware of these errors.
